Ultramicroscopy 36 (1991) 397–399
North-Holland

Subject index to volume 36

Analytical microscopy
The possibilities for analytical methods in photoemission and low-energy microscopy, *Bauer* 36 (1991) 52
Compositional variations in apatites with respect to preferential ionic extraction, *Cuisinier, Glaisher, Voegel, Hutchison, Brès and Frank* 36 (1991) 297
Multiple scattering correction by a direct convolution method, *Su and Schattschneider* 36 (1991) 385

Diffraction and optical diffraction
Effect of surface roughness of carbon support films on high-resolution electron diffraction of two-dimensional protein crystals, *Butt, Wang, Hansma and Kühlbrandt* 36 (1991) 307
Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361
Convergent beam electron diffraction and X-ray diffraction characterization of strained-layer superlattices, *Duan and Fung* 36 (1991) 375

Electron energy loss spectroscopy
Biological calcium absorption edge imaging using monochromatic synchrotron radiation, *Panessa-Warren, Tortora, Stears and Warren* 36 (1991) 277
Multiple scattering correction by a direct convolution method, *Su and Schattschneider* 36 (1991) 385

High resolution
Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361

Historical
Historical perspective and current trends in emission microscopy, mirror electron microscopy and low-energy electron microscopy, *Griffith and Engel* 36 (1991) 1

Image processing, 3D reconstruction
A computer-aided control, design and image-processing system for electron microscopes, *Habliston, Baker, Griffith and Skoczylas* 36 (1991) 222

Imaging
Biological calcium absorption edge imaging using monochromatic synchrotron radiation, *Panessa-Warren, Tortora, Stears and Warren* 36 (1991) 277

Instrumentation
Scanning versus direct imaging emission microscopy, *Veneklasen* 36 (1991) 63
Design of a spectroscopic low-energy electron microscope, *Veneklasen* 36 (1991) 76
Low-energy electron microscope of novel design, *Liebl and Senftinger* 36 (1991) 91
Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
Design features of an ultrahigh-vacuum electron microscope for REM-PEEM studies of surfaces, *Kondo, Yagi, Kobayashi, Kobayashi, Yanaka, Kise and Ohkawa* 36 (1991) 142
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252
A study of small electron probe formation in a field emission gun TEM/STEM, *Weiss, Carpenter and Higgs* 36 (1991) 319

Low energy electron microscopy, photoemission microscopy
Historical perspective and current trends in emission microscopy, mirror electron microscopy and low-energy electron microscopy, *Griffith and Engel* 36 (1991) 1
Emission microscopy and surface science, *Mundschau* 36 (1991) 29

Elsevier Science Publishers B.V.

The possibilities for analytical methods in photoemission and low-energy microscopy, *Bauer* 36 (1991) 52
Scanning versus direct imaging emission microscopy, *Veneklasen* 36 (1991) 63
Design of a spectroscopic low-energy electron microscope, *Veneklasen* 36 (1991) 76
Low-energy electron microscope of novel design, *Liebl and Senftinger* 36 (1991) 91
Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
The scanning photoemission microscope: a novel tool in surface science, *Von Oertzen, Rotermund, Jakubith and Ertl* 36 (1991) 107
Synchrotron-based imaging with a magnetic projection photoelectron microscope, *King, Borg, Kim, Yoshikawa, Pianetta and Lindau* 36 (1991) 117
Photoelectron holography for high resolution spectromicroscopy, *Tonner* 36 (1991) 130
A UHV-compatible photoelectron emission microscope for applications in surface science, *Engel, Kordesch, Rotermund, Kubala and Von Oertzen* 36 (1991) 148
The morphology of carbon films and surfaces studied by photoemission electron microscopy, *Wang and Kordesch* 36 (1991) 154
Methods and application of UV photoelectron microscopy in heterogeneous catalysis, *Rotermund, Engel, Jakubith, Von Oertzen and Ertl* 36 (1991) 164
Photoemission electron microscopy in metallurgical research: applications using the Balzers KE3 Metioscope, *Hammond and Imam* 36 (1991) 173
Nonlinear organic photoemitters: their properties and possible applications in electron microscopy, *Massey, Ash and Zhou* 36 (1991) 186
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
Biological applications of photoelectron imaging: a practical perspective, *Birrell, Hedberg, Habliston and Griffith* 36 (1991) 235
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252
Bibliography on emission microscopy, mirror electron microscopy, low-energy electron microscopy and related techniques: 1985–1991, *Griffith, Habliston and Birrel* 36 (1991) 262

Methods and techniques

A computer-aided control, design and image-processing system for electron microscopes, *Habliston, Baker, Griffith and Skoczylas* 36 (1991) 222
Use of Kikuchi line intersections in crystal symmetry determination: application to chalcopyrite structure, *Baba-Kishi* 36 (1991) 355
Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361
Determination of the effective source from its image in the backfocal plane of the objective lens, *Hosokawa, Suzuki and Ibe* 36 (1991) 367

New developments

Photoelectron holography for high resolution spectromicroscopy, *Tonner* 36 (1991) 130
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252

Particle optics, experimental

A study of small electron probe formation in a field emission gun TEM/STEM, *Weiss, Carpenter and Higgs* 36 (1991) 319
Determination of the effective source from its image in the backfocal plane of the objective lens, *Hosokawa, Suzuki and Ibe* 36 (1991) 367

Reflection electron microscopy, reflection high-energy electron diffraction

Design features of an ultrahigh-vacuum electron microscope for REM-PEEM studies of surfaces, *Kondo, Yagi, Kobayashi, Kobayashi, Yanaka, Kise and Ohkawa* 36 (1991) 142

Specimen preparation

Effect of surface roughness of carbon support films on high-resolution electron diffraction of two-dimensional protein crystals, *Butt, Wang, Hansma and Kühlbrandt* 36 (1991) 307

Spectrometers, auxiliary apparatus

Nonlinear organic photoemitters: their properties and possible applications in electron microscopy, *Massey, Ash and Zhou* 36 (1991) 186

Surfaces, clusters, interfaces and particles

Emission microscopy and surface science, *Mundschau* 36 (1991) 29

Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
A UHV-compatible photoelectron emission microscope for applications in surface science, *Engel, Kordesch, Rotermund, Kubala and Von Oertzen* 36 (1991) 148
The characterisation of GaAs/(Al,Ga)As heterostructure interface roughness using Fresnel analysis, *Ross and Stobbs* 36 (1991) 331

Abstracts / Announcements / Book reviews / Comments / Editorials / Reports
